

UTILIZATION OF HEALTH FACILITIES

Reporting from private facilities augmented

With the public hospitals and health centers, huge numbers of private and NGO-run health facilities are increasingly participating in sending patient-related data to the MIS-Health. For the year 2011 (January to December), we received data from quite a good number of hospitals and health centers (Table 6.1). From these health facilities, reportedly 112,565,162 patients received healthcare from their outpatient departments. The number of children (both sexes) was 22,740,810. The number of

male adults was 34,923,121, and the number of female adults was 54,901,231. The number of reported admissions was 4,323,961, of which 1,617,793 were for males and 1,915,072 were for females. The number of hospital deaths was 26,086, of which 12,452 were among males, and 7,559 were among females; the number of deaths of children (both sexes) was 6,075. The average hospital death rate was 0.60%. Detailed information on each hospital/health facility is given in the annexure.

Table 6.1. Number of admissions, deaths, and outpatient visits in different types of health facilities (2011)

Note: As per reporting organizations

Figure 6.1 shows the distribution of the OPD patients by type of health facilities. Of the total 112,565,162 patients reported to be seen in the outpatient departments, 64% were seen in the health facilities having only outpatient services of special-purpose hospitals (TB hospital, leprosy hospital, infectious disease hospital, labor hospital, government employees' hospital, union subcenter, health and family welfare center, TB clinic, community clinic, etc.); 21% patients were seen in the primary-care hospitals (upazila health complex, rural health center, and 10- or 20-bed hospital). In the secondary-care hospitals (district or general hospitals), 8% patients were seen. The tertiary-care hospitals (medical college hospital, dental hospital) and the postgraduate teaching hospitals served 5% and 1% of the outdoor patients respectively. The Bangabandhu Sheikh Mujib Medical University Hospital served 1% of the total reported outdoor patients.

- A = Primary-care hospitals; 23,418,806; 21%
- B = Special-purpose hospitals; 71,695,117; 64%
- C = University hospital; 1,509,991; 1%
- D = Tertiary care hospitals; 6,235,386; 5%
- E = PG specialized hospitals; 696,765; 1%
- F = Secondary-care hospitals; 9,008,087; 8%

Figure 6.1. Distribution of OPD patients by type of facilities (n=112,565,162)

MIS-Health received report on admissions for the primary-, secondary-, tertiary-care hospitals, postgraduate specialized teaching and special-purpose hospitals. Reports on 4,323,961 admissions from these hospitals in 2011 have been received. Figure 6.2 shows the distribution of admitted patients. Of the total admitted patients, the primary-care hospitals had 45%; the secondary-care hospitals had 28%; and the tertiary-care hospitals and the postgraduate teaching hospitals had 23% and 3% admissions respectively. The special-purpose hospitals had 0.2% of the total admissions. Bangabandhu Sheikh Mujib Medical University Hospital had 1% of the admissions for year 2011.

- A = Secondary-care hospitals; 1,199,790; 28%
- B = Special-purpose hospitals; 7,677; 0%
- C = Primary-care hospitals; 1,981,654; 45%
- D = University hospital; 41,589; 1%
- E = Tertiary-care hospital; 1,003,003; 23%
- F = PG specialized hospitals; 110,329; 3%

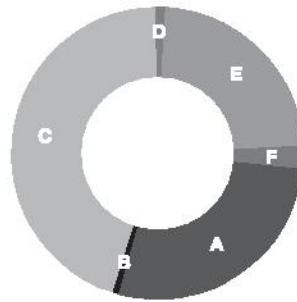

Figure 6.2. Distribution of admitted patients by type of health facilities (n=4,323,961)

Table 6.2 shows the average length of stay, bed-occupancy rates, hospital death rates, average daily admission and average daily OPD patient visits in different types of hospitals. Detailed information is given in the annexure.

Table 6.2. Average length of stay, bed-occupancy rates, hospital death rates, average daily admission, and average daily OPD patient visits in different types of hospitals (2011)

Figure 6.3 shows the distribution of the upazila health complexes by bed-occupancy rate. MIS-Health received data to calculate bed-occupancy rates for 404 upazila health complexes. It revealed that the bed-occupancy rate varies between 50% and 100% in over 65% upazila health complexes,. The bed-occupancy rates were seen to vary from below 40% and above 100% to 140%. Table 6.3 shows a time series analysis of the bed-occupancy rates from 2005 up to 2011.

It is welcoming that MIS-Health received data on admissions, hospital deaths, and outdoor visits from some private hospitals. Table 6.4 summarizes the data.

Smiling Sun Franchise Program

The Smiling Sun Franchise Program (SSFP) is funded by the United States Agency for International Development (USAID). It is intended to complement the wide network of health and family-planning facilities of the Government of Bangladesh resorting to an innovative approach to healthcare franchising. To achieve relevant health outcomes, the Smiling Sun Franchise Program jointly works with partnering NGOs to convert the existing network into a viable social health franchise. The program uses a build-operate-transfer (BOT) methodology to set a plan for developing the Franchise Manager Organization into an operational entity so that it can fully assume franchise operations by the end of the program. Currently, 28 NGOs are providing healthcare services to women, children, and youths through 320 static and 8,500 satellite clinics in 61 districts of Bangladesh; 34 clinics of this network are providing Emergency Obstetric Care (EmOC) services. This network will continue to expand the volume and types of quality healthcare under Essential Service Delivery (ESD) provided to the able-to-pay customers as well as

To achieve relevant health outcomes, the Smiling Sun Franchise Program jointly works with partnering NGOs to convert the existing network into a viable social health franchise. | Total | 25,324,739 | 20,341 | 0 | 3 | 62 | 0 | 56 | 6,016 |

Note: Only female patients; SSFP operates emergency obstetric care facilities with 270 sanctioned beds

ability to cover operational expenses from 25% to 31%, and the current level of sustainability is approximately 41%. By the fourth year of this program, SSFP aims to generate sufficient income to support approximately 70% of the operational cost while maintaining access to those who cannot afford to pay for services.

During 2011, three hundred twenty (320) smiling sun clinics treated 25,324,739 outdoor patients while 20,341 patients were admitted in and

discharged from 34 EmOC (ultra) clinics. As in previous years, no patient died in smiling sun clinics during 2011. In 34 ultra-clinics, patients stayed, on an average, for 3 days while their bed-occupancy rate was 62%, which is 10-point higher than the previous year. In 34 EmOC clinics, on an average, 56 patients were admitted per day. During 2011, a total of 20 comprehensive EmOC clinics conducted 6,016 major surgeries (c-section), which is 4% higher than that in the previous year.
